

WHO WE ARE

Global Swing is an independent record label and platform founded and run by Garrett David, rooted in Chicago's house music lineage and operating between the US and Europe. Built through years of involvement in record shops, clubs, and parties, Global Swing has developed into a recognizable cultural universe defined by its sound, visual language, and DIY values. The label has earned critical attention for its ability to balance heritage with forward motion, honoring tradition while remaining contemporary. A strong and cohesive visual identity runs through all releases, merchandise, and events. In 2025, Global Swing expands its scope with the launch of Healing Channel, a sub-label and parallel dimension focused on more introspective, experimental, and conceptual approaches to club and electronic music.

THE MISSION

Our mission is to challenge the status quo in an oversaturated club landscape. We prioritize strong, cohesive visual language and thoughtful programming to cut through the noise and create lasting impressions for both audiences and venues. This approach mirrors how we operate as a label: consistency over hype, culture over trends, and long-term vision over short-term gains. By treating parties as true extensions of the label, with the same feverish dedication to quality, we build trust through unwavering commitment to our vision and the experience of the party-goer.

OUR EXPECTATIONS

For all collaborations, Global Swing requires full creative control over branding, flyers, and overall visual direction for events. This consistency is essential to preserving the integrity of the project and ensuring a clear, unified experience for the audience. All showcases must include a dedicated design allotment for visual materials, handled by our in-house designer esoe, allowing the event's visual identity to align seamlessly with the established Global Swing aesthetic. While we work closely with venues and promoters on logistics, timelines, and practical considerations, creative direction remains non-negotiable. This framework enables efficient collaboration and results in events that feel cohesive, intentional, and culturally considered.
