ARTIST BIOGRAPHY

American born, Palestinian Dj Maher Daniel is no stranger to the international dance circuit.

Starting his early humbling years as a resident at the infamous Stereo Montreal, his growth rapidly took off with a slew of heavy releases which set him up as well respected artist in the industry.

After moving to Barcelona, Maher was able to continue his growth, with the launch of his record label The Other Side, allowing him to build his repertoire even more.

The output created allowed him to work with some of the most prolific artist in the minimal house circuit, eventually leading him to work with the likes of (a:rpia:r) sound system Ricardo Villalobos to name a few.

With an ever growing catalogue of music and label showcases hosted world wide, Maher continues to push his career to higher grounds.
