

THE OTHER SIDE

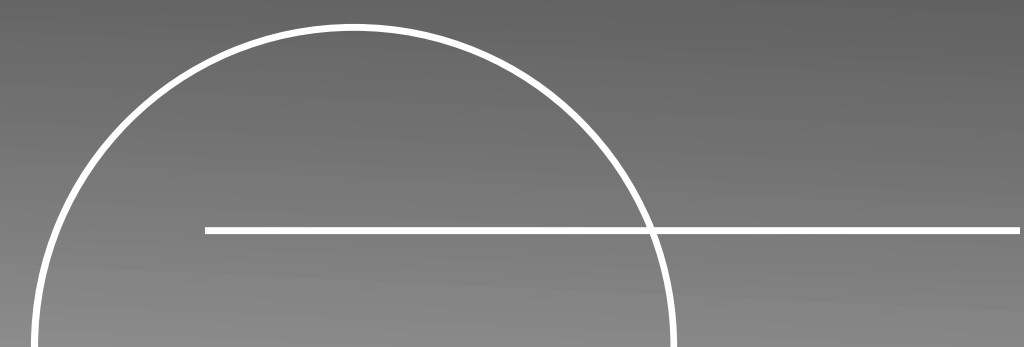

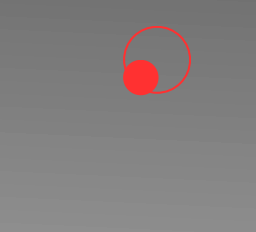

The Project

Created by Maher Daniel, The Other Side has carved out a leading position in the international minimal house scene. After years as a resident at Montreal's iconic Stereo club and releasing a string of acclaimed records, Maher relocated to Barcelona, where he launched the label as an extension of his artistic vision.

Since then, The Other Side has grown into a global platform, collaborating with some of the most influential names in the circuit. With its expanding catalogue and reputation for world-class showcases, the label will be celebrating its 10 years anniversary in 2026.

Musical Concept

The Other Side is dedicated to exploring the deeper dimensions of minimal house and beyond. The label and its showcases serve as a meeting point between tradition and innovation, drawing inspiration from pioneers like Ricardo Villalobos and the (a:rpia:r) collective while spotlighting fresh voices pushing the sound into new territories.

Each event is designed to adapt to its environment, whether an intimate club setting or a larger scale showcase, while preserving the same mission: to curate lineups that channel groove, subtle complexity, and hypnotic flow, creating a profound connection between the artist and the audience.
